

Access Smart

Whether Restaurant or Retail, you need to control who has access to the sensitive areas of your business.

Amphion's Access Control Products Include:

- Exit Security Devices
- Exit Alarms & Annunciators
- Stand Alone Access Control
- Electronic Access Control
- DETEX, SECURITECH, ALARM LOCK, CODELOCKS, KANTECH, MONITOR, KABA and more
- Services include supply, installation, service and support

Here are 5 reasons why:

1. Your employees need to be protected, especially after hours. An Access Control system ensures that any area you deem "employees-only" stays that way. And when your employees feel safe, they can focus on the productivity of your business.
2. With an Access Control system, you can restrict employee access to only those days and times they are supposed to be on-location, and you can prevent access to areas outside of their job responsibilities. This reduces opportunities for employee theft and limits the possibilities for leakage of sensitive corporate data.
3. Access Control systems also mitigate potential damage from terminated or disgruntled employees. Once personnel issues are identified, employee access can be immediately revoked to protect property and maintain employee safety.
4. Access Control systems can track every individual moving in and out of your business. If a crime does occur, you can review a log of who was onsite when the criminal activity occurred. An Access Control system also helps track attendance and punctuality, along with other productivity issues.
5. An Access Control system can save lives. Employees work varying schedules — part-time and seasonal employees come and go, as do outside vendors and contractors. If there is an emergency, you can still know exactly who is in the building and ensure that everyone is safe and accounted for.

We Are Amphion

A security Integrator with a Radical Approach to Service

What this means to you:

- We understand the causes—and the solutions—of restaurant and retail shrink.
- We deliver comprehensive loss prevention and security products and services.
- We operate a nationally-renowned technical support task force to service your needs nationwide.
- We provide a US-based, 24-hour technical support team along with a comprehensive service management model.
- Our certified technicians are onsite within four hours of the initial call—7-days a week, 365 days a year.

Our customer service is simply fanatical, with next-generation security expertise and professionalism on-demand.

The Amphion National Service Program

- We deploy only Amphion-certified technicians, strategically located throughout the country.
- Our customers rely on a single resource for all their installation and service-related needs.
- Amphion is widely recognized as a leading provider of physical security equipment and service for the loss prevention and asset protection industry.

What you need for access control:

Access control systems typically feature 3 components:

1. A physical barrier, including a door, turnstile or speedgate
2. An identification device, such as a card and reader, PIN pad or biometric device
3. A door controller and software, including everything from single-door control to access points linked over a wide-area network

How we support our access control systems:

- Rapid Response Security Services
- Technical Support Task Force
- Unlimited Telephone Access
- Certified Technicians
- Emergency Onsite within 4 Hours
- 7 Days a Week, 365 Days a Year, 24 Hours a Day
